“Hand Washing: Clean Hands Saves Lives” — CDC

Hand washing is one of the best ways to protect yourself and your family from getting sick.

Follow these five steps every time —

- 1. Wet your hands with clean, running warm water, turn off the tap, and apply soap.**
- 2. Lather your hands by rubbing them together with the soap. Lather the backs of your hands, between your fingers, and under your nails.**
- 3. Scrub your hands for at least 20 seconds. Need a timer? Hum the “Happy Birthday” song from beginning to end twice.**
- 4. Rinse your hands well under clean, running warm water.**
- 5. Dry your hands using a clean towel or air dry them.**

If soap and water are not readily available, you can use an alcohol-based hand sanitizer that contains at least 60% alcohol.

How to use hand sanitizer —

- 1. Apply the gel product to the palm of one hand (read the label to learn the correct amount).**
- 2. Rub your hands together.**
- 3. Rub the gel over all the surfaces of your hands and fingers until your hands are dry, about 20 seconds.**
