

STEP AHEAD Enzyme Floor Cleaner

EP714

STEP AHEAD is an innovative combination of three cleaning technologies specifically designed to remove tough grease and stains from floors and grout. Patent-pending surfactant technology provides immediate cleaning aided by lipase to digest grease into smaller particles which are more readily emulsified. Then bio-enzymatic action kicks in to attack embedded residual soils. Destroys organic soils, eliminating odors at the source. Neutral pH, contains no butyl and it will continue to attack organic grease and food waste when discharged down the floor drain.

Where To Use

Kitchens Schools
Universities Hospitals
Restrooms Restaurants
Locker rooms Showers
Grocery Stores

Dilution

Light soil 1/32 (4 oz/gallon)
Medium Soil 1/20 (6.5 oz /gallon)
Heavy Soil 1/10 (12.8 oz / gallon)

Directions

Remove large particles from floor surface by sweeping or vacuuming. Place wet floor signs where appropriate. Dilute product based on the chart above into a clean mop bucket. Using a clean mop apply Step Ahead liberally on the floor for heavily soiled floors. Agitate with mop to ensure all areas of the floor and grout are saturated and rinse thoroughly. For lighter soils, the floor need not be rinsed.

Technical Specifications

COLOR: Transparent	VISCOSITY: Water Thin
FORM: Liquid	STORAGE(Unopened):...1 Year @R.T.
SCENT: Pleasant	BIODEGRADABLE: Yes
pH: 7.5-9.0	WEIGHT/GAL:8.4 lbs
FLASH POINT: . N/A	SHIPPING CLASS:N/A
PACKAGING: ... 4x1 gallon	
TYPE: Enzyme Floor Cleaner and Degreaser
